**RE: FP111**  
**Spinning Flagpole**

Dear Customer,

As described in our product write-up, the spinning flagpole can be used with flags up to 36" high.

To install a 36" high flag so that the top half of the flagpole remains free to spin with the slightest encouragement, be sure to place one of the sliding nylon collars at each extreme end of the upper pole.

Fasten a flag by feeding the nylon screws on the collars through the flag's top and bottom grommets. If desired, use the clip at the top of the pole to ensure the flag remains firmly fixed. (*Note: When the topmost collar is correctly positioned, the clip will hang a bit loose, but its function will not be compromised.*)

Should you have any questions regarding this product, one of our Customer Service representatives would be happy to assist you.

Sincerely,

Lee Valley Tools Ltd.
